PROJECT PROPOSAL

I. Group's information

Student ID	Fullname	Gmail
20127285	Trần Hồng Minh Phúc	thmphuc20@clc.fitus.edu.vn
20127298	Nguyễn Trần Minh Quang	ntmquang20@clc.fitus.edu.vn
20127343	Phạm Ngọc Anh Thư	pnathu20@clc.fitus.edu.vn
20127355	Trần Thiện Tiến	tttien20@clc.fitus.edu.vn
20127610	Trương Samuel	tsamuel20@clc.fitus.edu.vn

II. Introduction

App's name: Moosic

Our idea is to create a music streaming app like Spotify or Zing MP3. We choose this because everyone like musics so this app will easily approach everyone.

III. Target users and environments

People of all ages or artists who want to upload their songs, albums can use this app.

App's platform: Android.

IV. Key features
- Login and register accounts. There will be 3 types of account user, artist and admin
- For user account, they can stream music or download music; create their own playlists; add songs to favorites
- For artist account, they can upload new songs, albums to app; view statistics of songs, albums
- For admin account, they can approve new songs from artist and manage account.
- Basic buttons like play, pause, repeat, shuffle button when listening to music.
- Everyone can search by criteria (song's name, artist, genre, album)
- Everyone can share songs, album to social networks
- Light & Dark theme modes
